Technology Hiring Specialist with 8+ Years of Experience Across Global Markets!!

Proven expertise in recruiting and building high-performing software engineering teams across **India (Primarily / Majorly), Singapore, Australia, Hong Kong, and London**. Known for delivering end-to-end technology hiring, partnering closely with global stakeholders, and aligning talent strategies with business growth and market demands.

Strengths: Executive Sourcing | Engineering Leadership Hiring | Stakeholder Partnership | Talent Strategy | Market Intelligence

Ex organisations worked for : **Google, Oracle, Thoughtworks, The Trade Desk**

Experience :

Senior Recruiter - Tech - Speciality Roles (Bangalore, India)

Atlassian

Aug 2025 - Present

(Core Product and R&D Speciality Hiring)

Products - Rovo Search, ITSM, Jira AI, Central AI, Security ML engineers etc.

Teams : Search Infrastructure Teams - Machine Learning Engineering Teams - Cyber security / Product Security Teams - Central AI Teams - SRE's - DevOps

- Hired across senior IC (P50–P70) and leadership levels (M70), including ML Engineers, Backend Engineers, SREs, DevOps Engineers, Security Engineers, and Engineering Managers across AI/ML, Search, and Data
- Achieved **170% of hiring targets in Q2 and Q3**, consistently delivering on high-priority and niche roles
- Closed the first ML Security Engineer hire and filled a critical aging Search role within 2 weeks through targeted headhunting and market mapping

Building a unified Recruiting application (Recruiter Canvas) integrating ATS, scheduling, and reporting systems reducing manual effort, improving recruiter efficiency, and accelerating hiring through better pipeline visibility and analytics. Something similar to this, but a more complex version of it - [Link](#)

- Drove data-led hiring decisions using metrics such as PTR, time-to-fill etc.
- Partnered with senior leadership to prioritize critical roles, define hiring plans and deliver results.
- Mentored recruiters and sourcing teams on advanced sourcing, pipeline strategy, and candidate engagement. Closed ~7 highly niche roles within 5 months

Staff Tech talent Partner (IC 4) - Tech (Bangalore, India)

Postman API

March 2024 - Aug 2025 (1.6 years)

- Leading the hiring for the Core products, Data and the AI teams.
- Major product teams which I helped build were Postman API, Postbot AI, API Client, Performance Testing, Automation testing Etc. (Handled close to 6 Business groups at the single time)
- Hired more than 30+ people across levels from Sr EM's to Principal SE's also including AI, Data and Platform. (Offered the first AI Applied Engineer for Postman). Keeping the TAT < 40 days.
- Build the **Postbot AI founding team** working closely with the **Co - founder - [Abhijit Kane](#)**. Which now is expected to churn a business of 2+ million dollars. Also building the **Founding team for the Performance testing** product which is going GA by 2025.
- Worked on increasing the PTR's (Reduced it from 15:1 to 8:1) and strategizing the process to be more lean and fast. Also Created rubrics and Interview guidelines for different levels in engineering.
- Working with the leadership team to understand the P0 priorities and also Identify the key roles which have to be hired fast and with no compromise.
- Interviewer calibration and interviewer training which was a must to increase the talent density in the org. Also worked on Onboarding new folks.
- Self sourced and closed most roles caused reducing cost to hire.
- Worked with the RPO and the sourcing team in building Funnels of candidates for across levels while mentoring them to identify the best talent.
- Worked on e branding activities (Just started with some ideas)
- Worked in Building RCA's for the leadership team on Market Mapping, Acceptance ratio, Decline ratio etc.
- Built repos on knowledge base for Talent, Market, Compensation, complexity of product companies, information on tech market to the leadership team to help in identifying the best talent.
- Worked with Cross teams of HR, Compensation, HRBP to help in adapting with the market and created successful hiring plans.
- Had an offer to acceptance ratio at >95% and the acceptance to Joining >90%
- **I would be happy to talk more.**

Senior Recruiter - Tech - India / APAC (Bangalore, India)

The Trade Desk

Jul 2022 - Nov 2023 (1 year 7 months)

- Leading the Tech Hiring in Bangalore, India, involved in building the initial team from scratch alongside the Director of Engineering APAC and the Head of Eng.
- Lead an RPO / Sourcing Team of 4 people and was involved in Upskilling and leading them.
- (Hired for Singapore, Australia etc - Roles hired : Head of Product Design, Principal Designer, Senior / Principal Engineer etc)
- Played a key role in designing and refining hiring processes, emphasizing candidate-friendly approaches based on data insights.
- Worked across with different hiring managers from across regions providing them with market insights and talent layout in India to strategize hiring plans.
- Successfully handled a spectrum of roles from SE1 to Principal, including the recruitment of the first intern in India, with a dedicated focus on Diversity and inclusive hiring. Predominantly hired for Front- End and Backend Software Engineers.
- Sourced through and utilized various social media platforms for getting the right candidates with Diversity in mind maintaining 35-45% in active pipeline.
- Had a PTR of approx. 70% from source to close (Offer).
- Specialized in Technology hiring and mentored the RPO team for increased productivity in resume submissions and offer generation.
- Managed recruitment across APAC, specifically in Singapore and Australia, closing significant positions, such as one of the largest UX roles in APC.
- Set benchmarks for Compensation and Benefits, conducting market research to guide the leadership team in understanding market dynamics.
- Engaged as an end-to-end recruiter, overseeing the entire process from initial screening to offer negotiation.
- Led global projects, including Interviewer calibration, creation of Candidate prep documents, developing unified hiring process documents, Onboarding process development, and also creating various APAC strategies for hiring.

Recruiter Tech, Horizontals - India (Bangalore, India)

Google

Feb 2021 - July 2022 (1 year 6 months)

- Closed more than 50+ software engineering roles across, with maintaining a remarkable PTR throughout the funnel.
- Worked extensively on building and maintaining a consistent pipeline of candidates for Software engineering roles predominantly.
- Hired for backend, Eng prod, Full stack, Cloud Storage, Cloud Networking etc.
- Partnered with various product teams and connected with Hiring managers to understand the need and targets to set priorities and build pipeline.
- **Got the delivery superstar award for Q1 2022 and the highest offers in the team which lead to a promotion.**
- Sourcing and creating strategies to find new talent and explore the existing talent from our internal ATS. (LinkedIn , Internal ATS, Github Etc) i.e. also building great relationships between active and passive candidates.
- Partnered with different product teams to understand various demands.
- Worked across hiring for different levels from SDE to Staff/Senior staff software engineers.
- Take the candidates through the whole process from interviews to Hiring committee and also team fitment to comp. (End to End)
- Single POC for all the declines that happen in India (Worked 360 for these candidates).
- Mentored and buddied with sources and helped them ramp up at a faster pace. Onboarding champ and talent advocate.
- Built strategies and ran sourcing jams to build and help each other develop sufficient talent pipeline for the demand.
- DEI and Candidate experience was the major focus area and tried achieving it to a greater extent by building new methods and Ideas for it.
- Part of the talent insights project to understand why and where candidates are declining and to understand the various reasons.
- Worked on comp and upleveling of various candidates

(Started as Recruiter 1 and got promoted to Recruiter 2 in 1 Year)

(Both Oracle and Thoughtworks where 1 year contract roles)

Technical Recruiter (Coimbatore, Tamil Nadu, India)

Thoughtworks (**Contract**)

Mar 2020 - Feb 2021 (1 year)

- Owning complete recruitment Cycle End to End. Sourcing - screening - Offer creation. Built training modules for sourcing from various social media platforms.
- Built data driven approaches for various roles to identify and close with the right candidates.
- Discussing Head-counts and working with HM's in closing them.
- Maintained the hiring Mix.

Talent Sourcer (Bangalore, India)

Oracle (**Contract**)

Mar 2019 - Feb 2020 (1 year)

- Partnered with businesses like Product Development Units (Linux Engineering, ODA – Oracle Digital Assistance, Oracle Cloud Infrastructure (OCI), Linux Device Drivers, Oracle Financials, MySQL) , Cloud Development Units (OMCS, OCI), Support Orgs (ACS, Oracle Managed Cloud Services), Finance Org (GFIC).
- Team up with Talent Advisors & Hiring manager in understanding the Job Description and information about the team and building the right set of active candidate pipeline.
- Reaching out to the right set of Talent pools from job boards like Naukri and LinkedIn.
- Sourcing passive candidates from LinkedIn, Github, Stackoverflow, and various other social sites. Excellent with Boolean strings, X-Ray searches. (Good with slicing the data with the “NOT” operator) Creating leads through headhunting, referencing, team mapping & lead generation.
- Well versed with Volume and Niche hiring. Coordinated Events.
- Recruitment Research: Fine-tuning the market to understand the pool availability, CTC study for a particular skill and presenting the best insights to Hiring Managers & Talent Advisors. This will be achieved through strong market research.

Recruiter (Bangalore, India)

Careernet

May 2018 - Mar 2019 (11 months)

- Bridging the talents to top tech companies. I believe no candidate can be a REJECT for a role/firm, rather a mismatch for that role. With this core belief, I always look forward to place candidates based on role fitment not skill fitment
- Clients Hiring for – Nvidia, Sandisk, Qualcomm, Aricent, HP, Uhnder, Savari Systems etc.
- Predominantly worked on some leading Semicon product clients (Nvidia , Sandisk , Qualcomm , Savari , etc) and some startups.

- Sourcing, Screening through various portals. Understanding the Requirement and sourcing accordingly.
- Building strategies and researching new methods of sourcing.
- Was extensively working on some niche requirements and some Senior level roles. Rich exposure on the Embedded Software as well as on Application Software.
- Good experience on delivery management and candidate management. Also on the End to End recruitment process.
